

SARJY

A voice travel assistant that never states a travel fact she cannot source.

You speak. She speaks back. The screen is the receipt – an ivory visa card, a sentence-level audit of what she was allowed to say, and a dossier of what she remembers about you.

Deep dive [Guardrails & reliability – cite-or-refuse](#)

Saudi Arabia → Japan, live.

Travel Buddy answered this pair. The numbers on the card are the same strings the gate substituted into speech. Quota remaining is in the header.

Captured 21 September 2026 against the deployed URL. Tap to talk – no README.

eVisa

visa.type, substituted

90 days

visa.duration, substituted

quota chip, this session

The model proposes. Code writes the facts.

If the model could write “90 days” as free text while citing a tool that said 30, this would be a citation chip. It is a guardrail because a sourced line with a bare digit and no placeholder is rejected – even when a real tool is attached.

Sourced

Placeholder, then fill

Model writes `{visa.duration}`. Code substitutes the stored value, or rejects the line.

Quoted

Vendor’s own words

Model names a field and supplies no `text`. Code copies the API body verbatim.

Judgement

Ungated on purpose

Where to go, how long to linger. Her view. Recalled memory cannot become sourced.

sourced For `{pair.passport_name}` travellers, Japan is an `{visa.type}` for up to `{visa.duration}`.

kept For Saudi travellers, Japan is an eVisa for up to 90 days.

rejected · no_placeholder ~~You can stay for 90 days.~~

The third line is injected by `?gate_demo=1` into a real turn. She does not speak it. A rejected segment is still shown, struck through.

SARJY

For Saudi Arabia travellers, Japan is an eVisa. You can stay for up to 90 days once you arrive, as long as your passport is Valid on arrival. Sorting out the digital paperwork is well worth it for getting lost in the neon alleys of Shinjuku or finding a quiet moment at the Kinkaku-ji temple in Kyoto.

• WHAT SHE WAS ALLOWED TO SAY

3 spoken · 0 refused

SOURCED For Saudi Arabia travellers, Japan is an eVisa. (Travel Buddy — visa requirements, checked 2026-09-21, 2026-09-21T16:12:18+00:00)

SOURCED You can stay for up to 90 days once you arrive, as long as your passport is Valid on arrival. (Travel Buddy — visa requirements, checked 2026-09-21, live, 2026-09-21T16:12:18+00:00)

VIEW Sorting out the digital paperwork is well worth it for getting lost in the neon alleys of Shinjuku or finding a quiet moment at the Kinkaku-ji temple in Kyoto.

Same Japan turn. Two sourced clauses with citations; Kyoto is judgement (view). Zero rejected – use the flag to watch one.

Named hole · polarity. The gate binds values, not meaning. A sourced template can say “you don’t need a visa for `{destination}`” while `visa.type` is “visa required” and still pass. The card would contradict it. Stated in the README; not closed.

Eval first. Then three files.

7/8

Gate cases, 20 Sep. The miss is injection-2, labelled DESIGNED TO FAIL before the run.

4/4

Conversation cases that completed, including stay-on-Germany not Cairo. Timeouts reported as timeouts.

566 ms

Honest TTS TTFB median. Earlier 85 ms started after the Deepgram handshake.

Cascaded STT → LLM → TTS because the deep dive needs a text checkpoint. No spoken opener: she is silent through CHECKING SOURCES, then one gated answer. Whisper and Deepgram are a few hundred milliseconds. Gemini Interactions from Modal is slow (this week's live turns 11–31s). A Groq adapter is in the repo; the demo stays on Gemini because that is the model the gate was scored against.

photos after speech

Open these.

1. `backend/app/tools/gate.py` – registers, digit rule, placeholder rule.
2. `backend/app/pipeline/turn.py` → `run_turn` – card before call 2, one TTS of the kept string.
3. `frontend/src/ui/FactCard.tsx` – card values are the gated strings, not a parallel summary.

Cheat-sheet `docs/WALKTHROUGH.md`. Please use the live URL. This PDF is the preview if a Loom doesn't land first.

Arabic

Parked. Gate number-words are English-only.

Polarity

Values gated, not meaning. Named, not closed.
